

Care & Comfort Veterinary Hospital, Inc.

Client's Name _____ Patient's Name _____

At Care & Comfort Veterinary Hospital, Inc. we care about pets and people. We are a fully equipped veterinary hospital, and we are proud to provide you with excellent veterinary care in a modern, clean, and caring environment. Thank you for trusting us with the care of your pet today.

Our doctors choose a special anesthetic protocol for your pet based on its health status and age. Although we do not anticipate any complications with routine anesthesia or surgery, a healthy-appearing pet may be hiding symptoms of a disease or ailment that cannot be detected on a routine physical exam. Pre-anesthetic testing helps us evaluate your pet's health ahead of time, so we can avoid potential problems related to anesthesia and significantly reduce medical risks and ensure your pet's health and safety. During anesthesia we are particularly concerned with the proper functioning of your pet's heart, liver, and kidneys. The following diagnostic tests will help us address these vital organ functions prior to anesthetizing your pet.

Electrocardiogram (ECG): This test determines the health of your pet's heart.

I wish to have an ECG performed on my pet prior to anesthesia. \$40.00

I decline to have an ECG prior to anesthesia, I wish only to have the ECG monitoring during anesthesia.

Blood Chemistry Profile: Analyzes the health of your pet's vital organs.

I agree to a full in-house blood chemistry panel performed on my pet. \$116.50

I agree to a brief pre-anesthetic blood panel to check my pet's liver and kidney functions only. \$ 76.50

I decline blood work prior to anesthesia today and understand all risks.

Elizabethan Collars:

With most surgeries your dog or cat will need an E-collar to prevent licking or chewing at the surgical site. These collars dramatically reduce the risk of your pet licking sutures or bandages that may result in additional surgery and additional costs to you.

Yes, I need an Elizabethan Collar.

No, I already have a suitable Elizabethan Collar and will bring it at the time of discharge.

Nail Trim: The cost for nail trims are 50% off while under anesthesia.

Yes, I would like to have my pet's nails trimmed under anesthesia today.

No, I do not want my pet's nails trimmed today.

Microchip Pet Identification: \$55.00

Yes, I would like my pet to be micro chipped under anesthesia today.

No, I do not want my pet to be micro chipped today.

You will be contacted if there are any concerns regarding your pet's pre-surgical exam.
